

Table 8: Summary chart of the total unique proteins found for different chlamydiae lineage

Griffiths , E., Ventresca, M.S. and Gupta, R.S. (2006) *BMC Genomics*, 7:14.

Lineages	Number of unique ORFs (proteins)
<i>Chlamydiales</i> (<i>C. trachomatis</i> , <i>C. pneumoniae</i> , <i>C. caviae</i> , <i>C. muridarum</i> , <i>C. abortus</i> , <i>P. amoebophila</i>)	59
<i>Chlamydiaceae</i> (<i>C. trachomatis</i> , <i>C. pneumoniae</i> , <i>C. caviae</i> , <i>C. muridarum</i> , <i>C. abortus</i>)	79
<i>Chlamydophila</i> (<i>C. pneumoniae</i> , <i>C. caviae</i> , <i>C. abortus</i>)	20
<i>Chlamydia</i> (<i>C. trachomatis</i> , <i>C. muridarum</i>)	20
<i>P. amoebophila</i>	445
